BRING NATURE INTO YOUR SPACE

The idea of creating our products was born of the desire to bring ourselves closer to nature. Our unique range of 3D panel designs takes the use of interior wall panelling beyond the use of standard flat solutions, to new dimensions. Owing to their specific form, our panels improve the microclimate and the acoustic properties of interiors, whilst their modern design aesthetic and natural character decoratively transforms spaces. We hope you will be inspired by the natural beauty, quality, durability and diversity of our collection, and explore how our products can bring nature into your space.

FORM AT WOOD

DESIGNED TO TOUCH

DISCOVER THE UNIQUE COLLECTION OF WOODEN WALL PANELS

EDGE SERIES

The EDGE SERIES is a line of wall panels characterized by striking geometric forms. Simplicity and asymmetrical shapes allow designing many unexceptional compositions. Modest and straightforward surface refractions emphasize the uniqueness of the wood grain, bringing out its hidden beauty.

p. 6-19

SMOOTH SERIES

The SMOOTH SERIES was inspired by organic forms that come directly from nature. The subtle form of the panels becomes the background for the light, which creates an unusual play of shadows. SMOOTH SERIES is an exclusive line of panels characterized by elegance and subtlety, creating a unique atmosphere and prestige in the interior.

p. 20-31

FLAT SERIES

The FLAT SERIES was created to achieve better geometric effects and extend the possibility of designing wall compositions. In combination with 3D panels, FLAT SERIES products allow to create unique patterns, further emphasizing the spatial form of 3D panels. They can also serve as a simple and elegant facade in places that do not require spatial compositions.

p. 32-35

COLOR CARD

Available oak stainings. FORM AT WOOD offers several basic oak colors and bespoke solutions to achieve the best solution to your interior.

p. 36-41

FORIVI
AT WOOD

EDGE SERIES

FORM
AT WOOD

PRODUCT FEATURES:

- panel with an equilateral triangle profile
- no symmetry, the surface is refracted at three different angles
- minimalistic design
- geometric form that perfectly matches any interior
- arrangement in the form of a pattern as well as the entire wall

PRODUCT SPECIFICATION:

- thickness: 25mm
- material: engineered plywood + wood
- wood type: oak / american walnut
- finish: satin oil
- side width: 25cm
- weight: 350g
- 1m² = 38 pcs.
